PROFESSIONAL SUMMARY

Computer Science student at San Francisco State University focused on building end-to-end software systems and AI-integrated applications. Built a cross-platform AI assistant using Kotlin, Jetpack Compose, and the Gemini API, and a Python-based tool for generating network graphs from structured datasets. Strong foundation in algorithms, operating systems, and databases, with experience independently shipping working systems. Seeking the OpenAI Residency to grow as a research engineer and contribute to frontier AI tooling and experimentation.

EDUCATION

San Francisco State University	San Francisco, CA
Bachelor of Science in Computer Science	Expected May 2027
Relevant Coursework: Analysis of Algorithms, Data Structures, Discrete Mathematics, Operating Systems, Databases Software Development, Probability & Statistics	
De Montfort University	Leicestershire, United Kingdom
Foundation Degree in Software Engineering	Jun 2021 – Jun 2023
Relevant Coursework: Computer Systems, Web Development	

SKILLS

Programming Languages: Python, Java, Kotlin, JavaScript, C / C++ (Basic), Bash / Shell scripting, SQL Systems & AI Services: API integration, backend services, AI-powered applications
Frameworks & Tools: Jetpack Compose, Git, GitHub, MySQL, Google Colab, Android Studio
Hardware & Systems: Raspberry Pi 5, Linux-based systems, basic networking Foundations: Data Structures, Algorithms, Operating Systems, Databases
Languages: English (fluent), Uzbek (native), Russian (fluent)

PROJECTS

MarketForgeAI — AI Multi-Agent Platform	Python (Flask), REST APIs, Next.js 2025
- Developed a backend for coordinating multiple AI agents using Flask and REST APIs, including agent registration and message routing. - Implemented agent workflows with Fetch.ai uAgents and implemented a Next.js frontend for AI chat and analysis.	
MoveMate — AI Pose & Voice-Controlled Fitness Assistant	JavaScript, TensorFlow.js, BlazePose 2025
- Built a browser-based AI fitness assistant using TensorFlow.js + BlazePose for real-time pose detection, rep counting, and form checks. - Added hands-free control via voice commands and live visual/audio feedback.	
AI Assistant with Adaptive 2D Visuals	Kotlin, Jetpack Compose, JavaScript 2024
- Developing a mobile AI assistant with animated 2D visuals, integrating Gemini API responses - Designed Android UI using Kotlin + Jetpack Compose with reactive state handling.	

WORK EXPERIENCE

Salesfinity.ai — AI Sales Automation Startup	Engineering Contributor (Project-Based) 2024
- Implemented a website-integrated AI chatbot to serve as a client help center, handling user questions and basic support flows. - Integrated the chatbot with existing frontend components and backend APIs, focusing on usability and reliability.	
McDonald's, Inc.	Kitchen Crew & Cashier Jun 2022 – Jul 2023

ADDITIONAL LEARNING

UC San Diego | Object-Oriented Programming in Java
UC San Diego | Web Development
