EDUCATION

San Francisco State University | San Francisco, CA

Expected May 2027

Bachelor of Science in Computer Science

Relevant Coursework: Analysis of Algorithms, Data Structures, Discrete Mathematics,

Operating Systems, Databases Software Development, Probability & Statistics

Silkroad Innovation Hub | Fellow | San Francisco, CA

2026

De Montfort University | Leicestershire, UK

Jun 2021 – Jun 2023

Foundation Degree in Software Engineering

Relevant Coursework: Computer Systems, Web Development

SKILLS

Software/Systems: Linux | Git | REST APIs | GraphQL | PostgreSQL | AWS | GCP | Docker

Frameworks/AI: React | Next.js | NestJS | Node.js | Flask | FastAPI | Jetpack Compose | TensorFlow.js
| Gemini/Claude/GPT API | Prisma | Redis | Jest

Languages: Python | Java | Kotlin/Flutter | Swift | TypeScript | SQL | HTML/CSS

EXPERIENCE

Blaze Payments Inc. (YC24) | Software Engineering Intern | San Francisco, CA

May 2026 - Present

- Built an AI-powered payroll intelligence service that detects payroll patterns from bank transaction data, matches 18+ payroll providers (Gusto, ADP, Rippling), infers pay frequency, estimates headcount, and flags 1099 contractor thresholds — exposed via GraphQL and REST API with 26-unit tests passing across 6,900+ test suites (2,700+ LOC)
- Fixed critical payment infrastructure bugs in the Business API: silent bank account registration failures causing dead transactions, crypto wallet network enum mismatches, and unguarded withdrawals to unvalidated accounts — eliminating silent transaction failures for partner integrations processing live payments
- Designed the CLI auto-publish CI/CD pipeline with label-based semantic versioning, automated npm publishing and conducted a full security audit covering auth flows, injection vectors, and AI agent authorization boundaries across 15+ source modules
- Led end-to-end CLI QA across 8 command groups, built automated test harnesses with structured JSON validation, and fixed auth/session bugs including OAuth device flow, token refresh, and revoked key error handling

Salesfinity.ai | Software Engineer (Contract) | San Francisco, CA

2025

- Built and deployed an AI support chatbot (Flask + React) handling 500+ monthly queries, reducing manual work

PROJECTS

NorthBlue travel app | Co-Founder & Full-Stack Developer

2026 - Present

- Building a B2B2C AI platform connecting hotel guests with local tour operators, optimizing traditional OTAs
- Architecting multi-agent orchestration system (LangGraph) with manager-worker architecture coordinating hotel, restaurant, and excursion booking agents
- Built on Next.js 15, TypeScript, FastAPI, PostgreSQL (Supabase); integrated booking APIs (Ventrata/OCTO, FareHarbor) with human-in-the-loop authorization before transactions

AI Closet | Hackathon Winner | GitHub: bit.ly/closet-ai

2026

- Engineered a mobile-first React SPA with concurrent tri-LLM orchestration for real-time wardrobe analysis

AWARDS & ACHIEVEMENTS

- 1st Place — Silkroad Innovation Hackathon | San Francisco (2026)
- 2nd Place — SF Hacks | San Francisco (2026)
- Best Fetch.ai usage — UC Berkeley AI Hackathon | UC Berkeley (2025)
